Summary

Dedicated Senior Android Engineer with over 5 years of hands-on experience in developing innovative and high-performing Android applications. Adept at leveraging expertise in Java, Kotlin, Jetpack Compose, and Flutter, with a deep understanding of Dart for multi-platform development. Passionate about mentoring newer engineers and fostering a collaborative team environment while continuously enhancing my own skills as a software engineer.

Experience

Senior Software Engineer - Android

CommentSold

Feb 2023 - Present

• Worked with Live video playback with comments and reactions
• Worked alongside Project Managers and Team Lead in order to determine best roadmap for mobile project development
• Refactored Java code to more modern Kotlin and Jetpack Compose with MVVM frameworks

Software Engineer - Android

Rue Gilt Groupe

Jul 2021 - Feb 2023

• Led the Android development space on my team
• Developed highly visible member facing systems using A/B Tests that increased revenue by over $2 Million
• Worked with Leads and Stakeholders to determine which projects should be highest priority
• Trained and onboarded new engineers (Helped them understand our app, codebase and hierarchy)
• Worked along-side QA, Design and Team Leads in order to make sure the product that we shipped was of the highest quality and to design standards

Software Engineer

Sager Electronics

Jun 2019 - Jul 2021

• Develop modifications for implemented systems used within Business Process Management software used in day-to-day operations
• Write programs in Java that retrieve information from internal environments via REST API calls
• Work with Oracle SQL databases to store and retrieve information through programs written in Java and SQR
• Maintain already implemented systems using Version Control Systems - GIT
• Collaborate with other departments to fulfill necessary requirements in a timely fashion

Clinical Desktop Support

Boston University

Feb 2017 - Jun 2019
- In charge of Student Health Services website administration which used HTML and CSS
- Troubleshot and determined causes of issues
- Managed junior technicians and assisted with tasks
- Created scripts in Java for Error Log retrieval and debugging
- Maintained SQL Databases that housed confidential student information
- Stayed up-to-date on software and hardware in order to maintain network integrity
